**Access Home Insurance Company Receives Authorization to Depopulate
Nearly 6,900 policies from Louisiana Citizens Property Insurance Corporation**

Baton Rouge, LA, November 21, 2014 – Access Home Insurance Company (Access) has received authorization to depopulate nearly 6,900 policies and over \$13 million in premium from Louisiana Citizens Property Insurance Corporation (LA Citizens), the state-run “insurer of last resort”.

Annually, LA Citizens makes its policies available for depopulation by interested insurance companies. Under the program, insurance companies must obtain prior authorization from the insurance agent of record before a policy can be depopulated. This year, six companies made requests to depopulate approximately 36,000 policies with over 10,000 policies being authorized for depopulation.

“Approximately 90% of all policies requested by Access that were authorized to any company were authorized to us. We believe this validates our efforts to provide superior customer and agent service levels while offering policyholders the same or better coverage at rates averaging 10% below those of LA Citizens. We strive to get better and better each year”, said Enda McDonnell, Access Home Insurance’s Co-Chief Executive Officer.

The policies which will be assumed effective December 1, 2014, will renew onto Access Home Insurance paper at renewal.

Access Home Insurance Company is an admitted Louisiana-domiciled insurance carrier headquartered in Baton Rouge.

Access Home Insurance Company has earned a Financial Stability Rating of A, *Exceptional*, from Demotech, Inc. For more information about Demotech, visit www.demotech.com. Learn more about Access Home Insurance at www.accesshomeinsurance.com.
